

# Junior Business Innovation Specialist

ISTANBUL, TURKEY / FULL-TIME

## A World-Changing Company

At Appsilon Enterprise, we aim to disrupt the status quo in the diamond industry with ethical, sustainable, and affordable diamonds backed by extensive research and development. It's far from easy to create diamonds above the ground, yet we use advanced technologies to mimic the Earth's conditions to form real diamonds in our cutting-edge technology facility. We believe in discovering and developing the talent that is in each one of us. We offer positions that challenge your skills and inspire you to grow. Come and find the potential inside you. Let's grow together! If these types of projects excite you, we'd love for you to join us.

## The Role

Execute different projects simultaneously with the Business Team. Taking part and responsibility in business innovation processes. Hands-on execution with a focus on fast and flawless execution. Being a bridge between the technical and business team both in the Netherlands facility and the Turkish branch for product innovation processes.

## Core Responsibilities

- Fundraising tasks (Appsilon has just closed a Series A round)
- Market research
- Managing relationships with European universities and high-tech companies
- Preparing samples for high tech applications mostly for quantum technologies
- Working on collaboration agreements such as NDA & MTAs
- Organizing or conducting material characterizations
- Working closely with the Operations department for supply chain management
- Relationship building
- Preparing business reports and presentations.
- Working in a fast-paced startup environment with exceptional entrepreneurs.
- Lots of personal responsibility and space for own ideas.

## What We Value

- Good Command of English
- Bachelor's degree preferably from Materials Engineering, Electrical Engineering or similar departments
- Knowledge of Materials Characterization
- Strong Organization and Time Management Skills with Strong Analytical Thinking
- Internship Experience
- Be able to build and not just fix things
- Willingness to work hard & learn, willing to take responsibility
- Desired Characteristic Features: Curious, Persistent, Patient, Responsible, Proactive, Harmonious, and Energetic.
